

Whack a Mole: Hit the Lit

Dagbegnon Amouzou, Jesse Flores, Vicky Lin, Ekow Williams

Introduction:

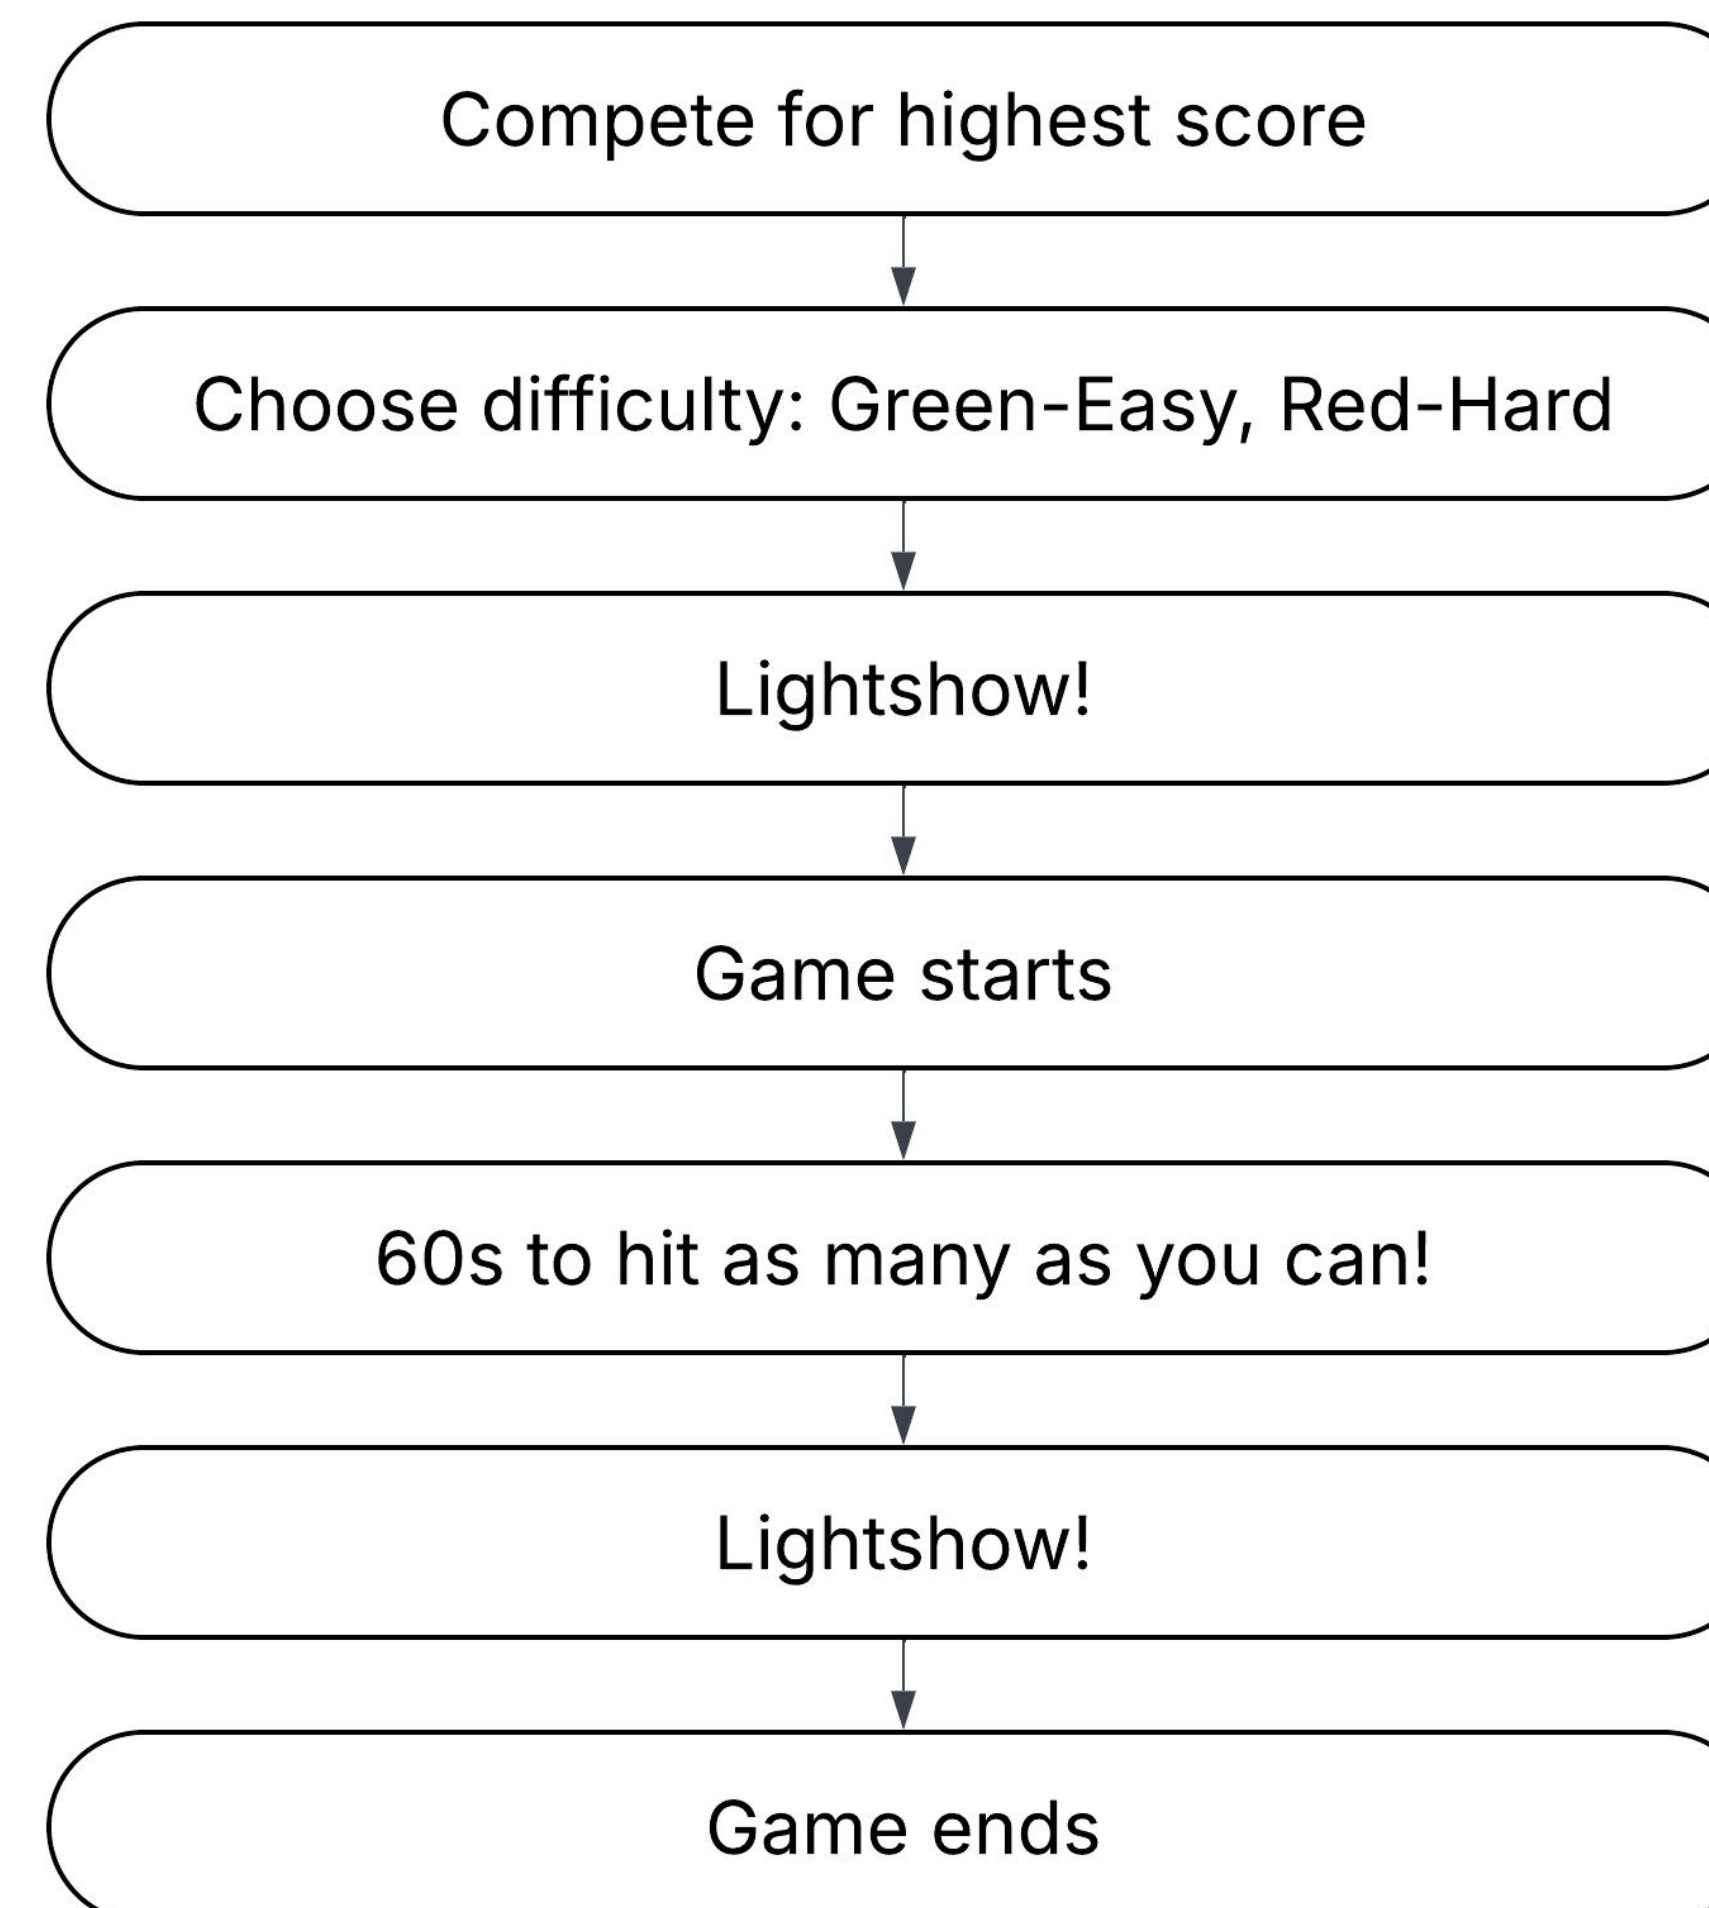

This project is a recreation of the classic Whack-A-Mole arcade game. The glowing 2x2 grid of moles tempts you to hit the button. The moment you hit a button, the board becomes unpredictable. Lights flash on at random, and you have only a split second to react before the mole disappears. Compete against others to get the highest score.

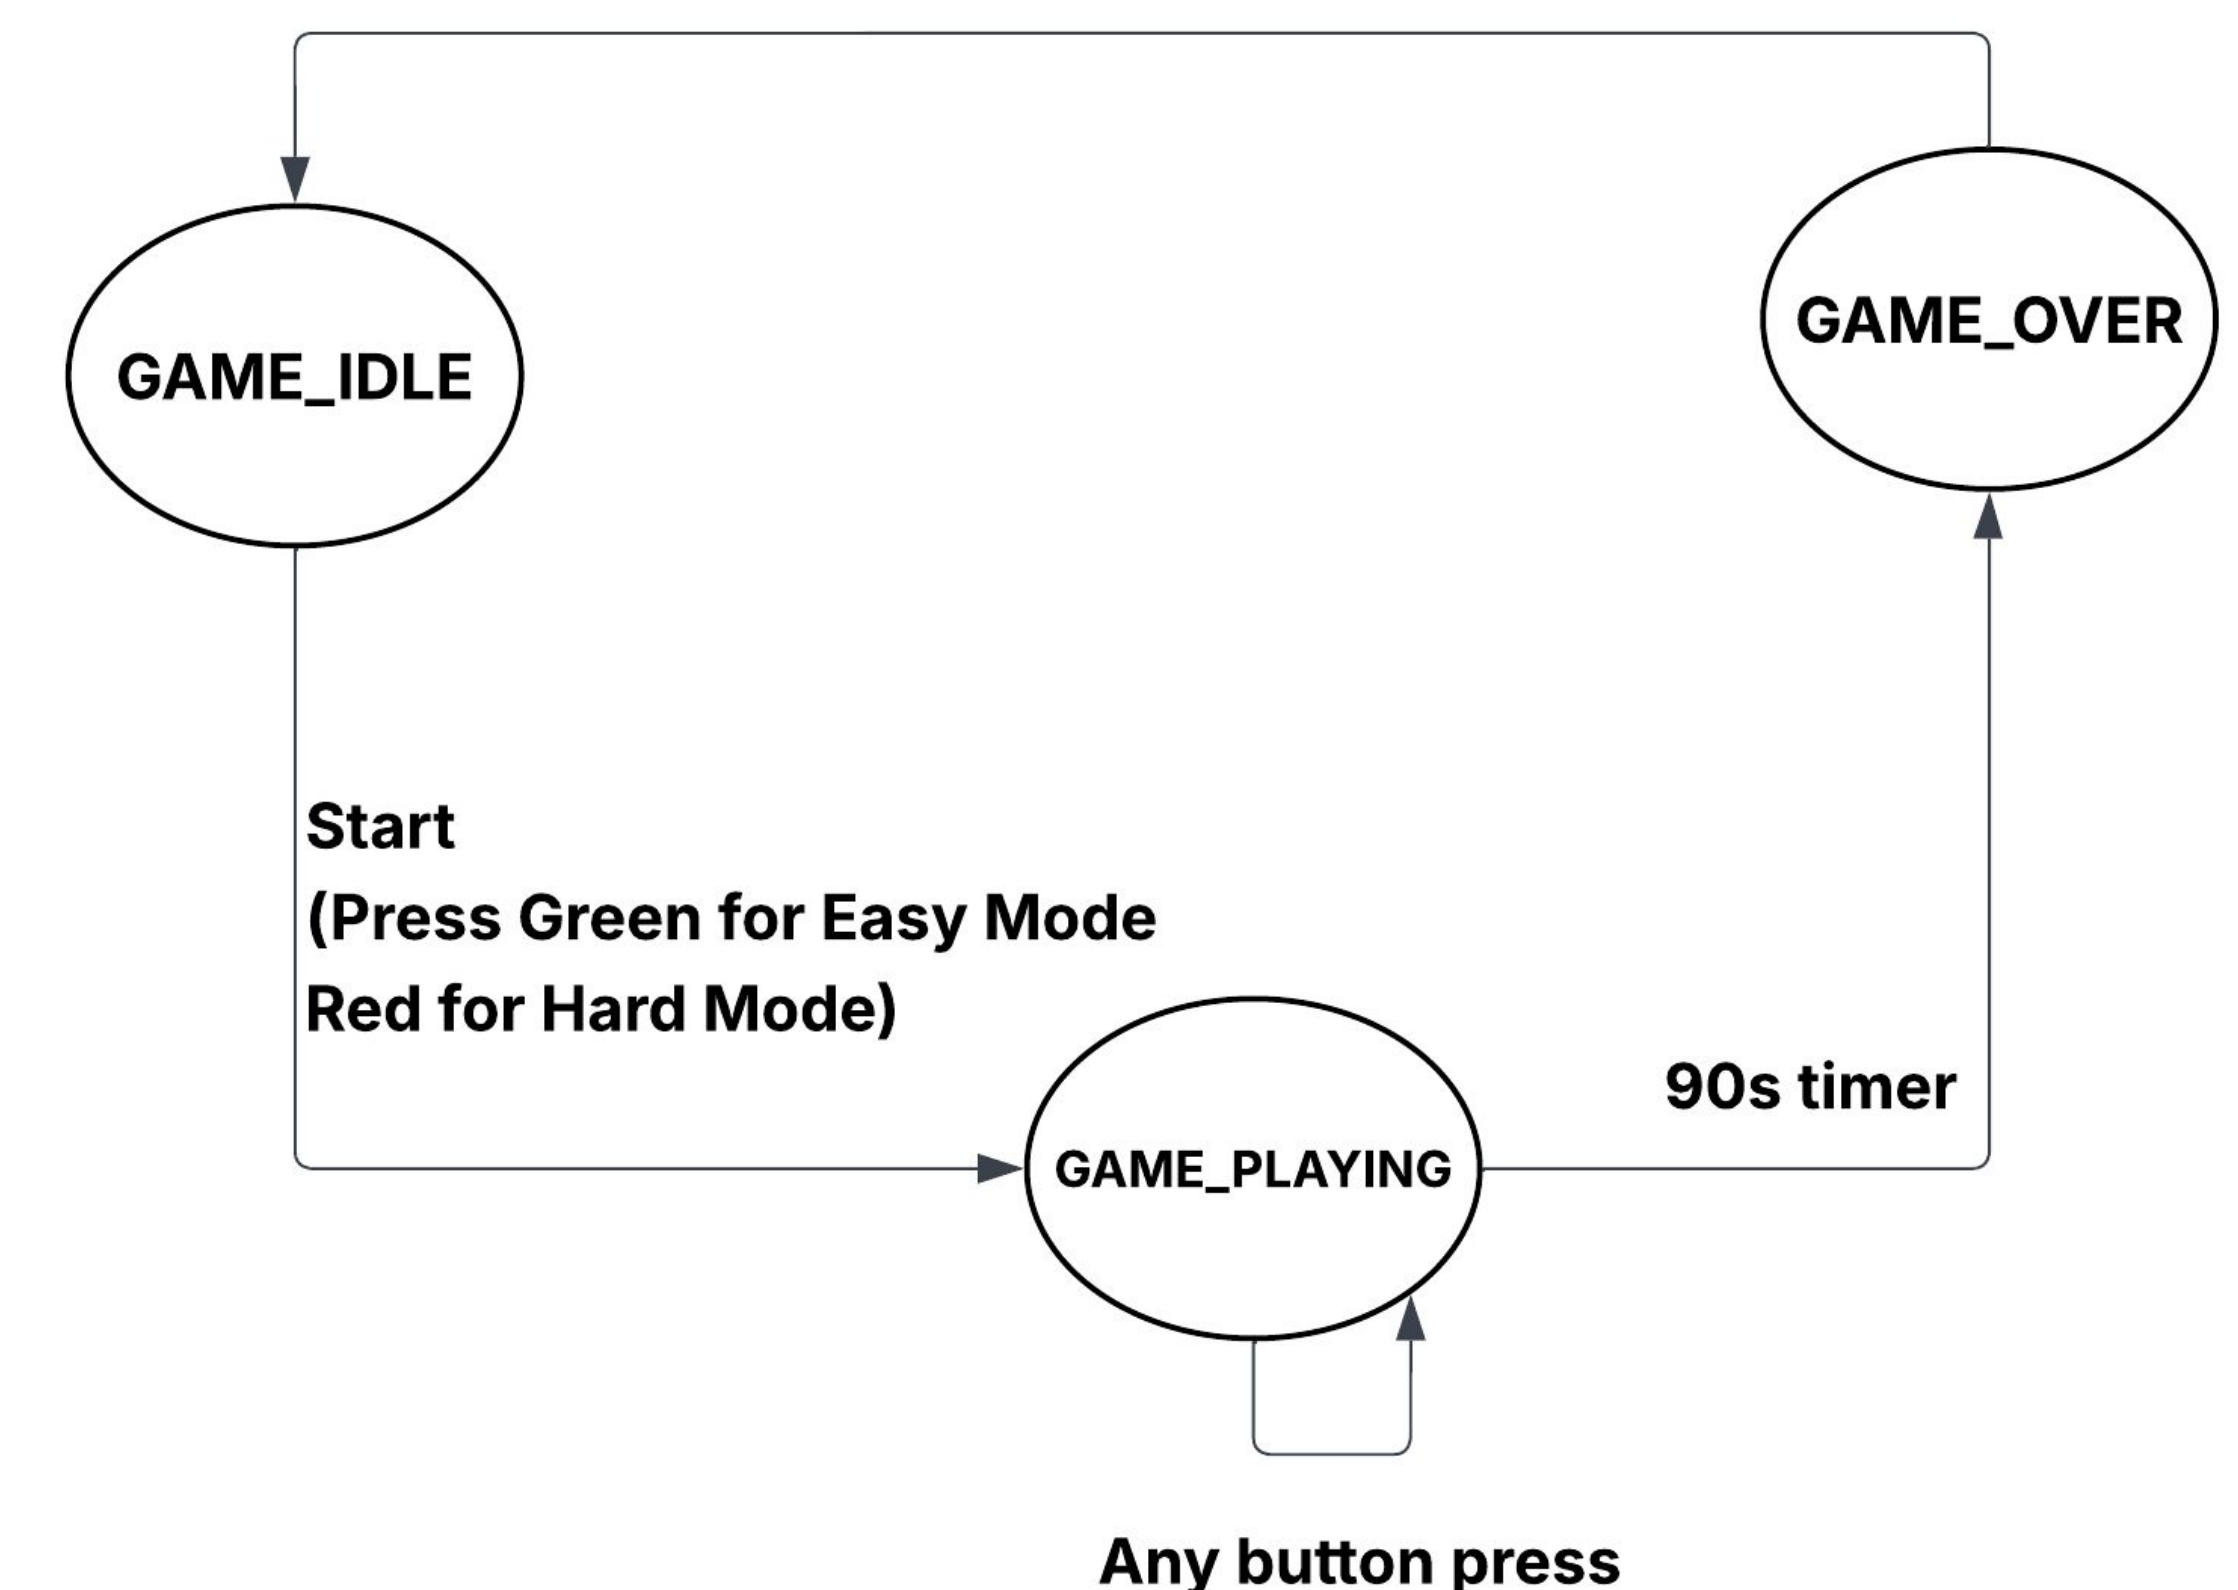

Physical Design:

The game board consists of a 2x2 grid of moles, where each mole is represented by an arcade button and its corresponding colored LED ring around the mole. The physical design of the game board, with moles made from air dried clay, was designed in Onshape and laser cut.

Gameplay:
